neither the Lin nor the Bull patents show the basic principals of the present claimed invention. These arguments are not undermined by the Primak patent, which is merely shown for its description of a nonce.

Applicants also direct the Examiner's attention to new claims 29-32. Here, the use of the information in the packet is described as being used to stop undesirable packets and/or denial service attacks. These features are not shown by any of the applied references.

Applicants believe that the present application is in condition for allowance. A Notice of Allowance is respectfully solicited. Should any questions arise, the Examiner is encouraged to contact the undersigned.

Respectfully submitted,
